Policy on Environment and Energy Utilization

Nirmala College of Pharmacy has taken a decision to control and protect the environment from pollution and by the irrational power consumption in the college campus. By the rational usage of energy and shall practice energy efficiency throughout all the campus utilities premises department and equipment etc by improving the cost effectiveness, productivity and working condition in the college.

Objectives:

- Sensitize students toward a clean and green sustainable environment in the campus.
- Optimizing the use of water energy.
- Using LED or CFC bulbs and other energy saving devices on the campus.
- Proper handling of solid waste from the campus.
- Encourage the use of public transport and carpooling for minimizing fuel consumption.
- Smoke free and tobacco free environment in the campus.
- Restrict single use plastic in the campus.
- By adopting a method for water recycling and rain water harvesting.
- Educate the students to create awareness amongst in the public.
- Assess the energy usage and measures its impact on environment.
- Generation of alternate energy, solar panels are installed.
- Turn of the fans and lights when they are leaving the class rooms, lecture halls, seminar halls, computer room etc.
- No use of lights or bulbs in the day time.
- Avoid the use of decorative lightings.
- By installing water heaters with non-conventional energy resources in hostel.

- Tree plantation in and surrounding of the campus.
- To provide a clean and green environment in and around the campus, it has been decided to take sustainable initiatives for environmental protection and efficient energy usage.

Energy Saving:

The staff members and students must have be lead initiatives to save significant electricity and have developed a policy for reducing electricity consumption by using LED and replacing the old tube lights with LED'S.

Smoke Free and Tobacco Free Campus

Authorities have taken suitable steps for a smoke free and tobacco free campus. The relevant placards are displayed to highlight the need for a clean, green and sustainable environment.

Renewable Energy

Solar energy is the cleanest and most abundant renewable energy source .The institute promotes solar energy the stake holders are encouraged for promoting and adopting renewable energy.

Pedestrian Friendly Pathway

Campus has sufficient space for parking two wheeler and four wheeler vehicles of staff and students. Roads inside the campus are well maintained. Pedestrians can walk safely on the pathway..

Plastic Free Campus

Minimum or no use of plastic is practiced by students, staff, faculty and visitors in the campus. The waste collection bins are kept in appropriate places and managed accordingly.

Waste Management

The institute practices some initiatives in waste management are as follows:-

1. Blue dust bins are used for the dry waste and Green dustbins are used for Wet waste.
2. Paper wastage is minimized by using one side used paper and half used paper for rough work.
3. Incinerations are used to destroy sanitary napkins for easy disposal in an environmental friendly way.
4. Encouraged to use electronic form of content instead of paper.
